

PELAGIC TRIP to the FARALLONES reset for SEPT 20

Windy weather cancelled our trip on Aug 30 at the last minute so we have rescheduled for Sunday, **Sept 20**.

The trip will be a full-day one from 8 a.m. to 4 p.m. The birds and marine mammals we shall hope to see include shearwaters, auklets, jaegers, Tufted Puffin, terns, murre guillemots, phalaropes, cormorants and Black-footed Albatross plus whales, dolphins and porpoises.

David Wimpfheimer who did a great job as trip leader for us last year, will be leading again.

Due to the change of date there are still several spaces available for this exciting trip, so anyone interested in participating should contact Helen, the trip co-ordinator, as soon as possible by Email at : helen_lindqvist@yahoo.com or phone 415-789-0703.

Participants will be notified of payment method and other trip details by reply Emails.

Members of other Audubon Chapters may join us if space is available.

So gather up your friends and come join us for a great day's cruise on the Pacific !!
